

## HUNKELER BANKNOTE PUNCHER HBP 100

### DESCRIPTION

The systems of destruction HCDS are providing centralised solutions for the cancellation of Banknotes. With the increasing demand of decentralized solutions in the agencies, the HBP 100 suits perfectly for the cancelling of banknotes. The HBP 100 decreases considerably the risks of transport and eases the logistic of the transfer.

### OPERATION

After pushing the infeed bin towards the end position, the punching process will be starting automatically. With the automatic unlocking, the drawer can be opened and during this operation, the unfit bundle will be ejected automatically on the conveyor.

### ADVANTAGES

- Simplicity of operation
- Automatic ejection of unfit Banknotes by a conveyor (plug and play)
- Compact construction
- Observation of punching process
- Transparent traceability thanks to different punching tools
