

HUNKELER DOCUMENT DESTRUCTION SYSTEM HDDS

SECURE DATA DESTRUCTION

The new shredder crushes data storage devices such as hard disks, mobile telephones, laptops and desktop computers. Information stored on data storage devices is destroyed in accordance to Din Norm 66399. Individuals can feed smaller data storage devices into the shredder through a narrow slot. For the destruction of larger EDP-devices, qualified personnel have access to the system via a lockable ingress gate.
